

TLi - COLLAGEN RENEWAL BOOSTING MASK

SKIN TYPES	Appropriate for all skin types including sensitive.
DESCRIPTION	Our Collagen Cellular Renewal Mask is ideal for tired, dull, dehydrated skin. This collagen boosting mask is a highly concentrated formula enhanced with Sepitonic M3, a multi-mineral chrono-energizer comprised of Magnesium, Zinc, and Copper. This anti-aging super ingredient is designed to help repair damaged cell membranes and fortify the skin's support structure to recover its vitality, firmness, and moisture balance. Firmer, softer, smoother, and more translucent skin is often noticeable after just 1-2 treatments.
DIRECTIONS	Professional Use- This is a single step process and the entire air-tight syringe should be used to evenly coat the treatment area before undergoing the LIGHTWAVE infusion treatment. Please see <i>Topical Light Infusion Cellular Renewal Collagen Mask</i> protocol for complete details.
POWER PURE™ INGREDIENTS	<p>Sepitonic®M3- is made up of Magnesium, Zinc and Copper. These elements help to maintain skin function and stimulate cellular regeneration while enhancing and brightening skin tone and restoring skin vitality.</p> <ul style="list-style-type: none"> • Magnesium- encourages protein synthesis and phosphates transfer. • Copper- encourages synthesis of ATP, keratin, and collagen. • Zinc- plays a role in the synthesis of DNA. It helps combat aging by stimulating reversal of the collagen matrix. <p>Magnesium Ascorbyl Phosphate - is a stable, water soluble derivative of Vitamin C. This potent antioxidant protects the skin from oxidation including UV rays, improves skin elasticity by stimulating collagen production, inhibits skin cells to produce melanin, lightens and brightens the skin, and acts as an anti-inflammatory agent.</p>
ACTIVE INGREDIENTS	<p>L-Taurine - is a powerful antioxidant that revitalizes and energizes skin cells while providing protection against oxidative damage.</p> <p>Vitamin B Complex (Yeast Extract) - a plant derived ingredient which provides intense moisture to dry, chapped skin while restoring elasticity and reducing fine lines.</p> <p>Phytic Acid - is a naturally derived plant extract that has keratolytic properties to aid in cell turnover. It inhibits the tyrosinase process and acts as a melanin formation blocker while providing protection against free radicals.</p> <p>Tetrahexyldecyl Ascorbate - a very stable, oil-soluble form of vitamin C. It can mitigate the damaging effects of UV exposure and stimulate healthy collagen production. It clarifies and brightens the skin by inhibiting the production of pigment for a more even skin tone. It also helps protect the vitamin C component from rapid oxidation.</p> <p>Docosahexaenoic Acid - is a fatty acid that helps supplement the skin's intercellular matrix and protect the skin cells from losing water. It is considered a natural moisturizing factor.</p> <p>Phosphatidylcholine - is an active ingredient in lecithin. Every cell membrane in the body requires phosphatidylcholine (PC). PC is considered a great water-binding agent.</p> <p>Ferulic Acid- scavenges free radicals and protects cells from environmental damage including UVB-induced erythema.</p> <p>Ascorbyl Palmitate - is a fat-soluble form of ascorbic acid, or vitamin C. This form of Vitamin C can be stored in cell membranes until it is required by the body. It manufactures collagen and is an effective free radical-scavenging antioxidant which promotes healthy skin.</p> <p>Dimethyl MEA - is a cell communicating ingredient that helps protect the cell membrane, has an anti-inflammatory effect, and increases skin firmness.</p>
COMPLETE INGREDIENT LISTING	Purified Water, Taurine, Yeast Extract, Copper Gluconate, Phytic Acid, Tetrahexyldecyl Ascorbate, Docosahexaenoic Acid (DHA), Sesamum Indicum (Sesame) Seed oil, Phosphatidylcholine, Ferulic Acid, Acetyl Carnitine HCL, Ascorbyl Palmitate, Magnesium Ascorbyl Phosphate, Magnesium Aspartate, Zinc Gluconate, Dimethyl MEA (DMAE), Benzyl Alcohol, Carbomer.
